

Amendments to the Claims

Please cancel Claims 1-58 without prejudice to or disclaimer of the subject matter recited therein.

Please add Claims 59-77 to read as follows.

59. (New) An information processing apparatus connected with a printing device, comprising:

a display unit adapted to display a setting window including a set value of a first setting item for printing and a set value of a second setting item for printing; and

a first changing unit adapted to, when the set value of the first setting item displayed in the setting window is changed into a second value from a first value, change the set value of the second setting item displayed in the setting window into a fourth value from a third value without any operation made by a user if determined to be desirable to change the third value of the second setting item in accordance with the second value of the first item, for printing.

60. (New) An information processing apparatus according to claim 59, further comprising a second changing unit adapted to, when the set value of the first setting item displayed in the setting window is changed into the second value from the first value, change the set value of the second setting item displayed in the setting window into the fourth value from the third value in response to an operation made by a user if determined

to be desirable to change the third value of the second setting item in accordance with the second value of the first item, for printing.

61. (New) An information processing apparatus according to claim 60, wherein said second changing unit displays an operation window for an operation made by the user and changes the second setting item displayed in the setting window into the fourth value from the third value if determined that the user makes the operation to change the value of the second setting item.

62. (New) An information processing apparatus according to claim 61, wherein said second changing unit does not change the third value of the second setting item for printing displayed in the setting window if not determined that the user makes the operation to change the value of the second setting item.

63. (New) An information processing apparatus according to claim 59, comprising a host computer.

64. (New) An information processing apparatus according to claim 59, wherein the first setting item and the second setting item include a setting of the printing device.

65. (New) An information processing apparatus according to claim 59, wherein the first setting item includes a setting for a medium and the second setting item includes a setting for a printing method.

66. (New) A setting method for printing, comprising:  
a displaying step of displaying a setting window including a set value of a first setting item for printing and a set value of a second setting item for printing; and  
a first changing step of, when the set value of the first setting item displayed in the setting window is changed into a second value from a first value, changing the set value of the second setting item displayed in the setting window into a fourth value from a third value without any operation made by a user if determined to be desirable to change the third value of the second setting item in accordance with the second value of the first item, for printing.

67. (New) A method according to claim 66, further comprising a second changing step of, when the set value of the first setting item displayed in the setting window is changed into the second value from the first value, changing the set value of the second setting item displayed in the setting window into the fourth value from the third value in response to an operation made by a user if determined to be desirable to change the third value of the second setting item in accordance with the second value of the first item, for printing.

68. (New) A method according to claim 67, wherein in said second changing step, an operation window for an operation made by the user is displayed and the second setting item displayed in the setting window is changed into the fourth value from the third value if determined that the user makes the operation to change the value of the second setting item.

69. (New) A method according to claim 68, wherein, in said second changing step, the third value of the second setting item displayed in the setting window is not changed if not determined that the user makes the operation to change the value of the second setting item.

70. (New) A method according to claim 66, wherein the first setting item and the second setting item include a setting of the printing device.

71. (New) A method according to claim 66, wherein the first setting item includes a setting for a medium and the second setting item includes a setting for a printing method.

72. (New) A computer program product comprising a computer readable medium having computer program code for a method of setting for printing, said product comprising:

displaying process code for displaying a setting window including a set value of a first setting item for printing and a set value of a second setting item for printing; and

first changing process code for, when the set value of the first setting item displayed in the setting window is changed into a second value from a first value, changing the set value of the second setting item displayed in the setting window into a fourth value from a third value without any operation made by a user if determined to be desirable to change the third value of the second setting item in accordance with the second value of the first item, for printing.

73. (New) A computer program product according to claim 72, further comprising a second changing process code for, when the set value of the first setting item displayed in the setting window is changed into the second value from the first value, changing the set value of the second setting item displayed in the setting window into the fourth value from the third value in response to an operation made by a user if determined to be desirable to change the third value of the second setting item in accordance with the second value of the first item, for printing.

74. (New) A computer program product according to claim 73, wherein in said second changing process code, an operation window for an operation made by the user is displayed and the second setting item displayed in the setting window is changed

into the fourth value from the third value if determined that the user makes the operation to change the value of the second setting item.

75. (New) A computer program product according to claim 74, wherein, in said second changing process code, the third value of the second setting item displayed in the setting window is not changed if not determined that the user makes the operation to change the value of the second setting item.

76. (New) A computer program product according to claim 72, wherein the first setting item and the second setting item include a setting of the printing device.

77. (New) A computer program product according to claim 72, wherein the first setting item includes a setting for a medium and the second setting item includes a setting for a printing method.
